**Employee leave:**

The white card (modal) is well-centered, but ensures it remains properly aligned across different screen sizes.

The "Apply for Leave" and "Leave History" buttons could have better spacing for readability.

The leave categories (Annual Leave, Sick Leave, Casual Leave) have bold text but could use consistent font sizing and weight for better visual hierarchy.
Ensure uniform font styling across all sections.

The modal looks good on a desktop, but ensure it adapts properly to mobile and tablet views.

Start Date:

End Date:

Reason:

The close button is too small and placed at the top right, touching the edge. Increase padding & size for better accessibility.
Adjust margin to prevent it from sticking to the edge.

There is no validation feedback if a user enters an invalid date or leaves fields blank.

Add inline error messages for required fields.

Show real-time validation when the user selects invalid dates.

Leave Type:

Annual Leave

Start Date:

20-03-202555

End Date:

30-04-202555

Reason:

Submit Request

The date fields display "20-03-202555" instead of "20-03-2025"
The date picker is not correctly formatting the year.
Keep the date validation between the year range (2000-2100).

The "Emp-Id" field is highlighted in blue, which could be a browser autofill effect.
Remove default autofill styling.

The form modal seems too narrow on larger screens.
Increase modal width for better readability.

**The "Reason" field is empty, but the submit button is still enabled.**
Add required validation and disable the submit button if fields are empty.
